Innovation. Leadership. Simulation.

We offer a Master of Science, PhD and MS-to-PhD pathway at Alfaisal University, in Saudi Arabia's capital city of Riyadh. Students experience a "hybrid" learning environment – 70% of the class sessions for Alfaisal students are held in person. This program is specifically designed for educators in health professions education who want to excel in healthcare simulation, leadership, research, innovation, curriculum design, program evaluation and learning outcomes assessment.

We are pioneers in simulation-based education. Our internationally respected faculty are part of the first and most established PhD program offering a concentration in simulation-based education and upon graduation, our simulation students observe a significant enhancement in the quality of their teaching.

- Access a worldwide interprofessional cohort across the healthcare spectrum.
- Develop the scholarship skills for implementing state-of-the-art educational research with a focus on simulation-based education.
- Fulfill the in-person requirements of local and regional educational authorities through this hybrid in-person and online version of the Masters or PhD.
- Gain innovation and leadership skills in health professions education.
- Become part of a community of practice and be connected with experts in your simulation area of interest to join you in your dissertation work.
- Gain the credentials for academic positions in health professions programs.
- Advance your career as an educator while building knowledge and skills as a scholar.

About MGH Institute

Founded in 1977, MGH Institute of Health Professions is a graduate school located in Boston and is the only degree-granting affiliate of New England's largest healthcare provider, Mass General Brigham. Our singular focus is on health professions, integrating student-centered learning in a dynamic environment where research and clinical excellence seamlessly converge. Our distinctive approach integrates rigorous education with immersive real-world experiences, ensuring that you are exceptionally prepared for your healthcare career.

Whether you are pursuing clinical or non-clinical studies, an advanced degree, or continuing professional development, our unique focus is what motivates and unites us. We are bound together by a shared purpose: to advance careers and care collectively.

Why Choose Us:

- Access to a vast network of 600+ clinical affiliates, including schools, hospitals, rehabilitation centers, clinical and educational sites across Boston and beyond.
- Exceptional graduation rate of 96%, among the highest in the nation.
- Dedication to interprofessional education, enabling clinicians skilled in collaborative teamwork and emphasizing client-centered care as the foundation of our practice.
- The Sanders IMPACT Practice Center at our Institute serves as a testament to our commitment. Here, students gain invaluable clinical experience, contributing over 10,000 hours in free services annually to our local community.
- A remarkable 40% increase in active research grants within the past year; reaching a total of \$44.6 million.

FINANCIAL SUPPORT

Many of our students have been able to finance their education through professional development resources available through their employers. Scholarships and financial aid mechanisms available in their countries of residence have also provided pathways for financing our students' graduate educations.

Degree Requirement

Applicants must have an earned bachelor's degree from one of the following:

- A regionally accredited U.S. college or university
- An accredited college or university (for those educated outside the U.S.)

Applications are accepted on a rolling admissions basis. For the most up-to-date information and application process details, please visit our website.

Learn. Lead. Care. Together.
